NEW! RST Touch Series Rheometers

Touch Screen Rheometers for Controlled Rate/Stress Measurement

Auto spindle recognition
identifies barcode on spindle shaft

Quick Connect
Spindle Coupling
for rapid spindle attachment
(all models)

The NEW RST series of touch screen rheometers offers the quickest and most comprehensive rheological testing capabilities for single point viscosity (QC) or complete flow curve analysis (R&D). With automatic data collection and analysis using optional Rheo3000 software, RST Rheometers offer greater flexibility and more features than other high-end rheometers in their class — at a fraction of the cost.

RST Rheometers have a durable design with rapid bob (spindle) attachment and easy-to-clean surfaces for years of trouble-free operation. Evaluate material behavior from initial yield stress through viscoelastic modulus to full flow curve response at variable shear rates to relaxation, recovery and creep.

The RST touch screen series is available in three configurations and all models feature:
- Controlled shear stress/rate operation to analyze flow behavior
- User friendly LCD touch screen with graphical display
- 11 memory slots for structured multi-step test programs
- Auto spindle identity recognition
- Quick connect coupling for easy spindle attachment
- Optional Rheo 3000 Software for PC control and data management
- 21 CFR compliance for controlled user access and data security

A portable RS model without touch screen capability is also available.

RST-SST Model measures soft solid materials like mayonnaise with special option for joint compound (BU units)

RST-CC Model allows for temperature control from -20·C to 180°C with choice of direct immersion in bath or external circulation with optional FTKY3 water jacket

RST-CPS Model offers choice of automatic or manual gap setting
Some popular applications include:

**ADHESIVES:** RST-CPS tests a variety of silicone-based adhesives at temperatures in excess of >200°C. Advantages include small sample volume (< 2mL), rapid temperature equilibrium with Peltier plate, variable shear rate (to 7,800 sec⁻¹) to duplicate conditions for actual adhesive use, quick test time (< 2 min).

**ADHESIVE INGREDIENTS:** RST-CPS with Peltier control excels at rapid QC measurements at defined shear rates. Optional Peltier plate changes temperature much more quickly than bath/circulator. Test throughput increases dramatically.

**BIOMASS:** RST-CC with vane spindle in coax chamber measures biomass fluids used for biofuel production. Easily handles suspended solids and evaluates important flow properties by simulating what happens to the material during pumping in production.

**CHOCOLATE:** RST-CC is instrument of choice for select manufacturers who run 24/7 operations requiring robust, reliable performance. Choice of optional serrated bob (spindle). Conforms to DIN and ISO test methods which quantify yield stress and consistency using Casson analysis. Affordable alternative to much more quickly than bath/circulator. Test throughput increases dramatically.

**DAIRY:** RST-CC with double-gap geometry measures low viscosity (<0.1 Pa•s) dairy products ranging from skim milk to thicker creams.

**GYPSUM:** RST-SST is popular choice for measurement of joint compound manufactured by the gypsum industry in accordance with ASTM C474. Small footprint, data display in BU units, and robust design make it ideal for lab and production floor use.

**PESTICIDES:** RST-CC with double-gap geometry measures various low viscosity formulations (0.001 Pa•s) at shear rates up to 5,600 sec⁻¹. Provides reliable capability in a busy QC lab measuring dozens of samples each day.

**PHARMACEUTICAL:** RST-CPS with open plate design for easy sample placement accommodates a variety of small sample sizes (< 4mL) and rapid temperature control using the Peltier option. Produces quick profiling of flow behavior, including yield stress and creep, important properties for characterizing ointments.

**PIGMENT DISPERSIONS:** RST-CPS with Peltier is used by a range of industrial markets, including plastics and paints. Handles broad viscosity range from thin formulations (0.025 Pa•s) to non-flowing pastes. Broad shear rate capability simulates both processing of materials (pumping and mixing) and application of material (brushing and spraying).

**SAUCES AND SYRUPS:** RST-CPS with Peltier replaces traditional hour-long viscosity tests which measure product from a cooking vessel after it cools to room temperature. Peltier option cools sample to 25°C in less than 1 minute, greatly reducing test time.

**SLUDGE/SLURRIES/CONCRETE:** RST-SST with vane spindle geometry measures diverse mixtures with particulates ranging in concentration up to 70% solids.
**RST-CPS Touch Screen Rheometer**

Cone/Plate & Plate/Plate Systems for Small Samples and Wide Shear Rate Ranges

**Controlled shear stress/shear rate operation** makes it easy to study material behavior from initial yield to flow curve response.

**User-friendly Touch Screen** and graphical display for stand-alone operation.

**Quick Connect Coupling System** for easy spindle attachment.

**Very Small Sample Size** permits rapid test set up and clean up.

**Auto spindle recognition** identifies barcode on spindle.

**Optional Rheo3000 Software** allows for PC control and data acquisition/analysis of multiple test files.

**Choice of Automatic or Manual Gap Setting** Rapid Temperature Control of plate with Peltier option for quick profiling of viscosity vs. temperature.

**What’s Included?**

- Instrument (with choice of water bath, Peltier or electric temperature control for sample plate)
- Convenience Package (USB Flash Drive, Stylus, Cleaning Cloth, Screen Protector)

---

**Optional Accessories**

- Choice of cone or plate spindle geometries at least one is required
- Rheo3000 Software (pg 6)
- Viscosity Standards (pg 2)
- Water Baths
- Solvent Trap
- Thermal Barrier
- KE Cooling Device

---

Choice of cone spindles and plate spindles accommodates all sample types. Plate spindles are used for highly-filled or very viscous samples.

**Thermal Barrier** reduces the effects of heat transfer to the environment. Two part chamber provides thermal isolation of the measurement zone.

The optional KE cooling device is required to cool viscometer bearings when testing with temperatures above 70°C.
RST-CC Touch Screen Rheometer
Coaxial Cylinder DIN Geometries for Single Point QC or Full Rheological Profiling

Auto spindle recognition identifies barcode on spindle shaft

Controlled shear stress/shear rate operation makes it easy to study material behavior from initial yield to flow curve response

Optional Rheo3000 Software allows for PC control and data acquisition/analysis of multiple test files

Quick Connect Coupling for easy bob (spindle) attachment

Rugged Design permits use on production floor

Small sample size facilitates rapid temperature control during testing

Temperature Control from -20°C to 180°C Choice of
- Direct immersion in bath
- External circulation using the FTKY3 Water Jacket

What’s Included?
Instrument with stand and adjustable height control with base
Convenience Package (USB Flash Drive, Stylus, Cleaning Cloth, Screen Protector)

Optional Accessories
Choice of Coaxial Cylinder Bob (spindle) and Chamber at least one bob and chamber is required
FTKY3 Water Jacket for Temperature Control Rheo3000 Software
Viscosity Standards Cone/Plate Accessory
KE Cooling Device (required for temperatures over 70°C)
PT-E Immersion Temperature Sensor
Disposable Chambers

Water Jacket
Chambers
Coaxial Cylinder Spindles
Double Gap Coaxial Cylinder for very low viscosity materials

K = 1 thousand  M = 1 million  1 Pa•s = 1000 cP (centipoise)
RST-SST Touch Screen Rheometer
Soft Solids Tester for Pastes, Slurries and Materials with Particulates

Auto spindle recognition identifies barcode on spindle shaft

Measured Values
- Yield Stress
- Shear Modulus
- Recovery
- Creep

Optional Rheo3000 Software allows for PC control and data acquisition/analysis of multiple test files
Quantifies meaningful properties like stiffness, wobbliness, sloppiness, consistency and texture

Capable of measurements in BU units for viscous materials such as joint compound

Vane Spindle Geometry
- Quick-Connect coupling
- Rapid spindle insertion without compromising sample structure
- Quick and easy test method

Coaxial Cylinders can also be used for complete flow curve analysis

K = 1 thousand Pa = Pascal

What’s Included?
- Instrument with base plate for sample placement and adjustable height control for rheometer head
- Convenience Package (USB Flash Drive, Stylus, Cleaning Cloth, Screen Protector)

Optional Accessories
Choice of Spindle Geometries at least one is required:
- Vane (spindle)
- Coaxial Cylinder Bob (spindle) & Chamber

Rheo3000 Software (pg 6)
Viscosity Standards (pg 2)
Cone/Plate Accessory
Thermosel System
PT-E Immersion Temperature Sensor

Choice of several vane spindle options

RST-90Y Spindle for BU measurements on joint compound and similar materials

Cone/Plate Accessory provides extended range capability for shear rate and viscosity
Rheo3000 Software
for Quick and Comprehensive Data Analysis Capabilities with RST series Rheometers

Enhance your productivity
VIA PC CONTROL WHEN CHARACTERIZING MATERIAL RHEOLOGY

Your PC can do the detailed data collection and analysis work for you. Rheo3000 allows you to program the RST Rheometer and control shear stress or shear rate. Data is saved in a SQL database for easy access by multiple users on a network. Use multiple step test programs for complete characterization of material flow behavior: viscoelastic modulus, yield stress, viscosity flow curve, creep behavior, recovery. In addition, Rheo3000 provides automated analysis of fluid behavior against user-defined control limit values, resulting in better quality control.

Mathematical data processing models included are: Newton, Bingham, Casson, Ostwald, Steiger-Ory, and Herschel-Bulkley.

Helpful features include:
- 21 CFR compliance option for controlled user access and data security
- Active clock on screen shows test progress to completion
- Export reports in pdf format; choose parameters of interest, discard others

**PC Requirements**

1.5 GHz Processor
1 GB System Memory
2.5 GB Hard Drive
VGA Graphics Adapter
1 USB/serial port (2 required for external temperature controller)
